

CASE STUDY

Meeting the Demands of

Architectural Excellence

M Resort Las Vegas, NV

M Resort | Designed and constructed by Marnell Corrao of Las Vegas

Bemo USA is a full systems company that combines years of high performance metal roof and wall experience with an unparalleled understanding of applications utilizing Stainless Steel, Zinc, Copper, Aluminum and Steel materials.

Bemo USA's extensive metal working experience has been used to produce some of the most unique and beautiful custom applications used in today's market. Through in-house design and testing, Bemo USA successfully designed, engineered, tested and fabricated these heavy gauge zinc panels to meet both the aesthetic and performance characteristics of this project

Bemo USA is the leader in providing innovative cladding solutions that are also environmentally responsive. Using low emissivity finishes, high recycled content materials and 100% recyclable materials, Bemo USA can help owners and architects with energy efficiency and credits towards LEED's certifications.

Materials:

Bemo HZ Wall Panels

1.5" deep x custom widths - 1.25mm Graphite Gray Zinc. Panels are custom designed tongue and groove horizontal rain screen panels with internal splice plates.

Installation:

by Western Building Group

Features:

- Interior and exterior walls
- 80,000sf of wall area on both vertical and inverted sloping fascias
- 1.25mm Gray Zinc material was used for its warm and natural appearance

Bemo designed and Fabricated the Wall System to accommodate airflow on the back of zinc wall panels.

“Bemo USA custom designed this wall system for its aesthetic appeal, performance characteristics’, constructability and low maintenance.”

Marnell Corrao, Team Member

BEMO·USA

shaping the way for architectural excellence

Bemo USA offers full systems design and materials selection services. Our engineering and sales personnel have decades of cumulative experience in working with unique applications using the most current construction techniques. Walls, Fascias, Soffits, Beam Wraps, and roofing installations can be efficiently detailed and specified.

The statement we hear most often from our many partners in the design community is that "If it has metal on it, we call Bemo first!"

Bemo USA is the leader in providing innovative cladding solutions that are also environmentally responsive. Using low emissivity finishes, high recycled content materials and 100% recyclable materials, Bemo USA can help owners and architects with energy efficiency and credits towards LEED's certifications.
